READY

EX SIGNON1

** WELCOME TO PADS - SYSTEM 0420 **

THE LATEST MESSAGE IS: IMPORTANT !  MAY 2000
WOULD YOU LIKE TO LIST THE BROADCAST MESSAGES (ANSWER YES OR NO)...
HIT THE ENTER KEY FOR YES.
Y
      **** IMPORTANT ****
      MAY 2000

      ** MESSAGE **

NOTICE: PADS TRAINING IS SCHEDULED FOR JULY 18, 19 AND 20, 2000
        AT THE FORRESTAL BUILDING IN WASHINGTON, DC..
```

Before using any commands specific to PADS, you must execute the SIGNON1 CLIST.

Do this by typing, at the READY prompt, the following:

'EX SIGNON1' [ENTER]

The PADS Welcome message will then be displayed. It will also list the date of the last system Broadcast message. Please take time to check this date for any system relevant messages. If the date displayed is a previous date from which you have read the Broadcast message, enter a 'N' at this prompt to bypass the messages.

However, if you have not read the Broadcast message from the date displayed, type 'Y' at the prompt to have the messages displayed.

Please note entering a 'Y' or 'N' is acceptable. It is not necessary to spell out yes and no.

READY

When the **READY** prompt appears, you are then ready to execute any of the available PADS system processes. These system options are entered after the **READY** prompt and are listed in the table below:

SYSTEM OPTION	DESCRIPTION
POMEGA	For entering PADS data into the system.
PADSUPDT	Submit Updates created in OMEGA to PADS
PRTUPDT	Print an Update report that has been sent to the terminal.
S2KQRY	Query the PADS Data Base.
S2KRPT	Submit/Generate system reports.
PRTBATCH	Print a report to your attached PC printer.
QRYHIS	Query the History Data Base.
FREEZE	Query and Submit system Reports from the Frozen Data Base.
TRAINING	The Training Environment which replicates production.

TRAINING

GOOD AFTERNOON ! WELCOME TO PADS TRAINING

You are now using the Training environment. The Training environment is a test area that has been set up to look like production, but will allow you to experiment without the fear of making mistakes. The following is a summary of the commands available in the Training environment.

POMEGA	Data Entry
PADSUPDT	Submit updates to PADS
PRTUPDT	Print an update report that has been sent to the terminal
S2KQRY	Query the PADS database
S2KRPT	Submit reports
PRTBATCH	Print a report to your attached PC printer

During the class, you will be using the Training environment to do Practice exercises for updating and querying the PADS database. This area will be available after class is through for you to use at your convenience.

Press ENTER to continue ...

READY

For the Training class, after you have executed SIGNON1 as noted previously, and the READY prompt is displayed, type

'training' [ENTER]

The Training menu will then be displayed as noted above. You may select any of the options listed. Once you have read the menu, PRESS [ENTER].

The system will respond by displaying the READY prompt. Now enter the PADS option you want to execute and press [ENTER]. For example to use POMEGA, type the command POMEGA and then press [ENTER].
